

AlgaApp: Add-On Services Flow and Instructions for Developer Integration

Objective: Integrate local service providers (cleaners, electricians, plumbers, drivers, etc.) into the AlgaApp platform as optional add-on services during or after booking.

Target Users:

- Guests booking short-term rentals in Ethiopia
 - Hosts wanting support with property prep or maintenance
 - Local service providers looking for income opportunities
-

Service Add-On Flow (User Experience)

1. Booking Confirmation Page

- After a guest books a property, they are directed to a "Booking Confirmed" page.
- Below the confirmation, display "Add Services to Your Stay" section.

2. Available Add-Ons (Dynamically Pulled)

- Cleaning Service (pre- and post-stay)
- Laundry Service
- Airport Pickup / Drop-off
- Electrical or Plumbing Support (on-call)
- Welcome Pack (optional snacks, drinks, or flowers)

3. Service Provider Profiles

- Each service option opens a profile preview: name, rating, photos, location, cost, availability.
- Guests select preferred service and time.

4. Checkout Integration

- Add-on services are bundled with the booking invoice.
- The total charge includes the room + selected services.
- Payment flows through AlgaApp.

5. Revenue Split Logic

- AlgaApp retains a fixed commission (e.g., 15%).
- Remaining payment is disbursed to the service provider (could be daily or weekly via mobile transfer).

6. Host Side Option

- Hosts can request a service directly through their dashboard (e.g., "Request cleaning before guest arrival").

7. Admin Panel

- Admin dashboard to verify and manage providers, adjust commission rates, and see booking history.
-

Instructions for Developers (Replit Team)

1. Service Provider Onboarding Module

- Create registration form for cleaners, drivers, electricians, etc.
- Collect: name, service type, ID photo, location, pricing, and availability.

2. Booking Flow Integration

- After payment step, add optional "Add-On Services" screen.
- Allow user to browse services based on property location.
- Add selected services to invoice and payment flow.

3. Payments and Revenue Split Logic

- Calculate 15% commission automatically per service.
- Build payout system to transfer remainder to provider.

4. Service Request Module (for Hosts)

- Add "Request a Service" button on host dashboard.
- Let hosts schedule add-ons directly from their booking page.

5. Admin Dashboard

- Build admin view to manage provider profiles, verify documents, and monitor transactions.
